V2.4 ENHANCEMENTS

VPG Intelligence Platform

UI Redesign Mockups & Enhancement Specifications

March 2026 | Reference for Claude Code Development

6 ENHANCEMENTS

1 Executive Dashboard

HIGH

Complete UI redesign — BU heatmap, actionable insights, industry drill-down

2 Intel Feed — LIKE

LOW

Add thumbs-up feedback button to improve signal quality over time

3 Recommendations

MED

Make recs specific: cite signals, name companies, quantify evidence

4 Split Scan / Email

HIGH

Separate collection from delivery. Run on demand, filter by BU/Industry

5 Reddit Fix

CRIT

Diagnose and fix 0-signal issue. API auth, collection pipeline, test button

6 Trends Overhaul

HIGH

Most important section. Named trends, sparklines, actionable intelligence

WHAT NEEDS ATTENTION

8.7	Kistler launches crash test sensor line	DTS
8.2	Figure AI expands 3rd manufacturing facility	Force
7.9	EU stricter vehicle weight regulations	OBW

ALERTS

🔥 Robotics signals up 73% — 3 weeks

⚠️ Kistler coordinated push (crash test)

📈 Force Sensors: 114 sigs (all-time high)

Automotive
16 signals -5%
Sentiment: Negative

WHAT NEEDS ATTENTION (Score ≥ 7.0)

8.2 Figure AI expands 3rd manufacturing facility
→ Target outreach to Figure AI procurement

7.5 Engineers seeking load cell alternatives to HBK
→ Create comparison guide: VPG vs HBK

7.3 Saronic autonomous naval vessel sensor RFP
→ Contact Saronic engineering team this week

COMPETITOR MOVES

Kistler	New crash test sensor line launch	Auto
HBK	3 negative mentions on Reddit	Robotics
Zemic	Price reduction campaign in APAC	Various

SIGNAL VOLUME OVER TIME

MOCKUP — Trends & Strategic Intelligence (NEW — Most Important Section)

SPLIT: SCAN vs. EMAIL DELIVERY

Two independent operations — collect on demand, email when ready

RUN SCAN

Collect and score signals from all sources

Date Range:

From: 03/01/2026 | To: 03/13/2026

Sources:

☑ RSS/Web ☑ Reddit ☑ Google Trends

Incremental: No duplicates. Existing signals updated.

SMALLER ENHANCEMENTS

INTEL FEED — LIKE BUTTON

← **NEW: Feedback improves future signal quality**

Liked signals train the AI to prioritize similar content.
Data stored for scoring adjustments in V2.5.

RECOMMENDATIONS — MORE SPECIFIC

BEFORE: "Consider monitoring robotics trends for potential opportunities in Force Sensors."

AFTER: "Robotics signals up 73% over 3 weeks (12 signals, 4 companies). Figure AI expanded manufacturing — high-value prospect. ACTION: Create Force Sensors robotics app note. Target Figure AI procurement this week. Evidence: Signal #847, Score 8.2."

REDDIT FIX — CRITICAL

Current: 33 subreddits configured, 0 signals collected. Collection pipeline is not connecting to Reddit.

Fix Steps: 1) Create Reddit app at reddit.com/prefs/apps (script type) 2) Add credentials to .env 3) Run diagnostic script 4) Test single subreddit collection 5) Add 'Test Collection' button to Reddit UI page

IMPLEMENTATION ORDER

1. **Reddit Fix** — CRITICAL
   Unblock data collection — currently zero signals
2. **Split Scan / Email** — HIGH
   Enable on-demand collection with deduplication
3. **Trends Overhaul** — HIGH
   Highest business value — the strategic intelligence view
4. **Executive Dashboard** — HIGH
   BU heatmap, actionable insights, industry drill-down
5. **Recommendations** — MEDIUM
   Specific evidence, named companies, concrete actions
6. **LIKE Button** — LOW
   Quick add — feedback loop for quality improvement
